

Download Climate Change Forests And Forest Management An Overview Fao Forestry Paper

Greenhouse gas emissions have significantly altered global climate, and will continue to do so in the future. Increases in the frequency, duration, and/or severity of drought and heat stress associated with climate change could fundamentally alter the composition, structure, and biogeography of forests in many regions. Forests and Climate Change Integrating Climate Change Issues into National Forest Programmes and Policy Frameworks Background Paper for the National Workshop, Sustainable forest management is the management of forests according to the principles of sustainable development. Sustainable forest management has to keep the balance between three main pillars: ecological, economic and socio-cultural. Successfully achieving sustainable forest management will provide integrated benefits to all, ranging from safeguarding local livelihoods to protecting the ... The FAO Forestry Paper series is FAO's main series in forestry. Most volumes are published in several languages. FAO Forestry Papers can be downloaded free of charge. Print copies can be purchased through the FAO Sales Catalogue. In addition, readers in developing countries can request up to five ...
