

Download Cure Your Autoimmune And Inflammatory Disease

An autoimmune disease is a condition arising from an abnormal immune response to a normal body part. There are at least 80 types of autoimmune diseases. Nearly any body part can be involved. Common symptoms include low grade fever and feeling tired. Often symptoms come and go. Autoimmune diseases affect over 250 million people all around the world, and many more suffer from chronic inflammatory conditions (1). Given that we live in a world that puts high demands on our bodies, its no wonder we've become so sick. Healing autoimmune disease requires taking a good look at ...Inflammatory Bowel Disease (IBD) is a term used to define conditions like Crohn's Disease, and Ulcerative colitis because they both define disorders that cause chronic inflammation of the digestive tract and the colon. Crohn's disease causes inflammation of the digestive tract epithelium characterized by 'skipped lesions' throughout the length of the small intestine, while Ulcerative ...Adrenal function plays an important role in moderating the inflammatory processes characteristic of autoimmune reactions. In autoimmune processes, the white blood cells of the immune system attack one or more parts of the body as if their tissue cells were intruders.
