

Download Minolta Manual Focus Lens Mount

The Minolta A-mount camera system was a line of photographic equipment from Minolta. The system used a lens mount called A-mount, with a flange focal distance 44.50 mm. The new mount was larger than the older SR-mount making old manual lenses incompatible with the new system. The mount is now used by Sony, who bought the SLR camera division from Konica Minolta, Konica and Minolta having merged ... The Minolta SR-mount was the bayonet mounting system used in all 35mm SLR cameras made by Minolta with interchangeable manual focusing lenses. Several iterations of the mounting were produced over the decades, and as a result, the mount itself was sometimes referred to by the name of the corresponding lens generation (f.e. "MC", "MD" or "X-600") instead. Using Manual Focus Lenses on Canon EOS bodies. Left: Bower fisheye manual focus Center: Vivitar 85/1.4 manual focus Right: Zeiss 21/2.8 manual focus. A common question from Canon EOS owners is whether older manual focus lenses from other manufacturers can be used with a Canon EOS body. RED Bailey's Minolta Collection (I only wish!) This is a very pre-liminary listing of all the lenses Chiyoda Kogaku and Minolta have sold in the SR Mount for Minolta manual-focus SLR cameras.
