Sex differences in psychology are differences in the mental functions and behaviors of the sexes, and are due to a complex interplay of biological, developmental, and cultural factors. Differences have been found in a variety of fields such as mental health, cognitive abilities, personality, and tendency towards aggression. Such variation may be both innate or learned and is often very difficult ... Queer studies, sexual diversity studies, or LGBT studies is the study of issues relating to sexual orientation and gender identity usually focusing on lesbian, gay, bisexual, transgender, asexual, queer, questioning, intersex people and cultures.. Originally centered on LGBT history and literary theory, the field has expanded to include the academic study of issues raised in biology, sociology ...
