

Download Touch And Go Joe An Adolescents Experience Of Ocd

Paul, not his real name, is pictured with his mother 'Julie.' Paul is 14 years old and has lived with severe OCD for a decade. Anxiety disorders are one of the most common mental health conditions in children and adolescents. While everyone may have occasional moments of feeling anxious or worried, an anxiety disorder is a medical condition that causes people to feel persistently, uncontrollably worried over an extended period of time.
