

Download User Guide File Delivery Service

FedEx Delivery Manager is a suite of options that provides U.S.-based recipients with convenience, flexibility and features to customize deliveries to their homes while packages are in transit, helping recipients avoid the inconvenience of missed deliveries. phone.systems™ is a fully-featured, cloud-based virtual PBX that is specifically designed to interconnect with any service provider. There is no special hardware to purchase and maintain, and phone.systems™ is compatible with all landlines, mobile phones and computers, SIP devices and multi-line desktop phones. Controller Service: Controller Services are extension points that, after being added and configured by a DFM in the User Interface, will start up when NiFi starts up and provide information for use by other components (such as processors or other controller services). A common Controller Service used by several components is the StandardSSLContextService. FedEx Express U.S. money-back guarantee details We offer a money-back guarantee for every U.S. shipment. You may request a refund or credit of your shipping charges if we miss our published (or quoted, as in the case of FedEx SameDay ®) delivery time by even 60 seconds. This guarantee applies to all U.S. shipments, commercial and residential, to all 50 states.
