The step-by-step approach in this article will help individuals to add the new SSL certificate on the Db2 server in the HADR environment. The detailed steps also include how to remove the old SSL certificate and then recreate and extract the new SSL certificate and how to reset the HADR... WebSphere Application Server (WAS) is a software product that performs the role of a web application server. More specifically, it is a software framework and middleware that hosts Java-based web applications. It is the flagship product within IBM's WebSphere software suite. It was initially created by Donald F. Ferguson, who later became CTO of Software for Dell.
