

Download Why We Argue About Climate Change

Eric Knight

Media coverage of global warming has had effects on public opinion on climate change, as it mediates the scientific opinion on climate change that the global instrumental temperature record shows increase in recent decades and that the trend is caused mainly by human-induced emissions of greenhouse gases. Almost all scientific bodies of national or international standing agree with this view ...TEDx is an international community that organizes TED-style events anywhere and everywhere -- celebrating locally-driven ideas and elevating them to a global...Featured. McKinsey Global Institute Our mission is to help leaders in multiple sectors develop a deeper understanding of the global economy. One mechanism is 1% or 2% changes in cloud cover, which can cause global warming or global cooling, due to circulation changes. This occurs in most if not all climate models on a year-to-year basis.
